

CURRICULUM VITAE

PERSONAL INFORMATION

| | |
|---------------------------|-----------------|
| <i>name</i> | M.P. Kruisbrink |
| <i>given name</i> | Max Paul |
| <i>date of birth</i> | 23-04-1989 |
| <i>place of birth</i> | Amsterdam |
| <i>nationality</i> | Dutch |
| <i>driving licence(s)</i> | A B |

WORK EXPERIENCE

Cryptocommunity

2019-Present Co-Founder — Netherlands

The Cryptocommunity platform is the only all-in-one social platform in the Netherlands, where the focus lies predominantly on investing in crypto for the long term, while being accessible for everyone. We go against the hype and do not partake in promising vast riches, pump and dumps and other flipping activities but focus on creating long-term value with our investments without the stress of trading. We offer courses, webinars and live sessions and teach retail investors of all levels how to get involved with crypto - safely.

Gemeente Rijswijk

2020-2021 Sr. Policy Advisor — Netherlands

As a policy officer for roads and civil engineering works, I was responsible for maintaining all roads and bridges. Budgets are always tight, and there was very little data available to work with (lack of insight). I had to monitor and allocate the different budgets, organize inspections, set up a maintenance and replacement program and formulate specific projects relating to the general status of the built environment. In addition, I looked at various broader scopes, such as procedures related to initializing integral projects with other municipality domains, data availability and other processes - which went far beyond my scope of responsibility.

*Van Oord
Offshore Wind*

2018-2020 Project Engineer — Ostend, Belgium

Part of the Cable Installation team where I am focusing on procedures for offshore operations and quality control of final as-built deliverable package. In addition, I manage several subcontractors which are responsible for design, manufacturing and supply of offshore power cables and cable protection systems which are installed to protect the high voltage infield cables as they enter the foundations of the wind farm.

*Royal Boskalis
Westminster N.V.*

Mar-Jun 2018 Graduate — Papendrecht, Netherlands

Graduate research project regarding an evaluation of currently available design tools and methods available to assess the stability of toe configurations for hydraulic structures such as dikes and breakwaters. This inventory of selected methods was compared in relation to the physical model test data obtained from scale models tests performed on the new design for the reinforcement of the Afsluitdijk project.

Cryptomanuals

2017-Present Co-Founder — Netherlands

With Cryptomanuals we contribute to the information infrastructure by constructing the necessary links for people to understand the market environment in which blockchain and cryptocurrency operates. We add value by creating awareness and are actively helping people understand the fundamentals of sound money, how blockchain and cryptocurrencies work,

what they represent, and why they are all so important in the twenty-first century.

| | | | |
|---|---------------|--|--|
| BAM International | Sep-Feb 16/17 | Intern Project Engineer — Limon, Costa Rica | Part of multiple divisions (buildings & electrical works, pavement & utilities and wharf) for the construction of a brand new container terminal located at the Caribbean coast, which is the biggest infrastructure project ever to be undertaken in Costa Rica. |
| Royal IHC | 2017–2018 | Working Student — Kinderdijk, Netherlands | Revisions of training material (i.e. books, presentations etc.) for the IHC Training Institute, which provides training and courses related to dredging and dredging technology. |
| Hanze University of Applied Sciences | 2016–2017 | Student Mentor — Groningen, Netherlands | Mentor of a class of 1st year students and tutoring for mathematical, hydraulic and mechanical courses in general.. |
| Van Oord Dredging | Feb-Jul 2016 | Intern Project Engineer — Mina Al-Zour, Kuwait | Revisions of reviewed documentation (drawings, reports, methods etc.), compiling of compliance reports for roads and marine works, writing reports, method statements and technical notes, keeping track of outstanding priority deliverables and assisting with the preparation of procedures. As a superintendent I was overseeing civil operations and the construction and soil testing of specific access roads to the refinery by subcontractor. |
